

Online Training and Examination CBCI Accreditation Course

About the Course

An introduction to the world of Business Continuity aligned with the ISO: 22301-2019. The modules cover all aspects of in-depth practice, providing practitioners with the understanding required for developing or maintaining a robust Business Continuity Management program.

Why Risklogic?

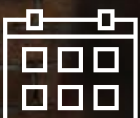

Offering one of the only completely virtual CBCI courses in Australia, Risklogic has received outstanding feedback on the facilitators, content, and structure of the online course. We are proud of our 99.9% pass rate, with most courses returning a 50% Merit pass.

Who should attend?

Professionals who have Business Continuity functions as part of their responsibilities and are seeking practical experience, theoretical frameworks & enhanced credibility within their organisation through Good Practice Guidelines training.

What is CBCI?

The Certificate of the Business Continuity Institute gives industry practitioners an internationally recognised credential in Business Continuity from the world's leading membership certifying organisation. It also allows candidates who pass to apply for qualified Statutory membership of the BCI.

Course Availability
